

PathFinder — Changelog

All notable changes to this project are documented in this file. The format is based on [Keep a Changelog](#).

[v1.0.0] — July 2026

Added — Phase 1: Foundation

- Project initialized with Vite (React + TypeScript) and Express.js (TypeScript).
- Prisma ORM configured with SQLite database.
- Database schema designed with 16 tables: User, StudentProfile, OrganizationProfile, Opportunity, Application, ApplicationEvent, Bookmark, Document, Notification, Skill, Certification, PortfolioLink, AIGeneration, SavedSearch, AuditLog, Ticket/TicketMessage.
- JWT-based authentication system (register, login, token verification).
- Password reset flow with Nodemailer and secure token generation.
- Rate limiting on authentication endpoints (5 req/15 min).
- File upload system with Multer (5MB limit, extension validation).
- Secure file access endpoint (images public, documents require auth).

Added — Phase 2: Core Features

- Student Profile Management (CRUD for skills, certifications, portfolio links, documents).
- Organization Profile Management (company details, logo upload).
- Opportunity CRUD operations with category and status support.
- Application submission flow with duplicate prevention.
- Application status management (6 states: PENDING → ACCEPTED/REJECTED).
- Application timeline tracking with ApplicationEvent records.
- Batch application status updates for organizations.
- Notification system with automatic triggers for status changes and new applications.
- Bookmarking system with composite unique constraint.
- Search and filter functionality (category, location, keyword).
- Custom CSS design system with glassmorphism, dark mode, and responsive layout.
- DashboardLayout component with role-based sidebar navigation.
- ProtectedRoute component for frontend route guarding.
- Landing page with hero section, feature showcase, and statistics.

Added — Phase 3: AI Integration

- AI Match Scoring Engine (0-100 compatibility score with explanations).
- Asynchronous match score calculation on application submission.
- Dual-mode AI architecture (live API + mock fallbacks).
- Resume PDF Parsing with profile data extraction.
- SOP Generator personalized to student profile and opportunity.
- Cover Letter Generator with professional formatting.
- Essay Generator with custom topic support.
- Personal Statement Generator.
- Profile Strength Analysis (11-point completeness checklist).
- AI Opportunity Recommendations (keyword matching algorithm).
- AI Candidate Summary for organization review.
- AI Generation History tracking.

Added — Phase 4: Polish & Deploy

- Admin Dashboard with platform analytics (users, opportunities, applications, status breakdowns).
- User Management (search, filter, role changes, account deletion).
- Opportunity Management for admins.
- Audit Log system.
- System Health monitoring (uptime, memory, database counts, Node version).
- Data Export as CSV.
- Support Ticketing System (create, view, message, resolve).
- Ticket types (BUG, REPORT, FEATURE_REQUEST, OTHER) and priorities (LOW, MEDIUM, HIGH).
- Threaded messaging within tickets.
- Dark mode / Light mode theme toggle.
- Deployed frontend to Vercel.
- Deployed backend to Render.

- Comprehensive 20-document documentation suite.

Security

- bcrypt password hashing (10 salt rounds).
 - JWT authentication with 24-hour expiry.
 - Role-based authorization middleware.
 - CORS configuration.
 - File upload type and size validation.
 - Rate limiting on auth endpoints.
 - Protected file access for documents.
 - Anti-enumeration on forgot-password endpoint.
-
